EDUCATION

B.A. Computer Science, GPA: 3.5/4.0

August 2021-May 2025

LINDENWOOD UNIVERSITY, MO

TECHNICAL SKILLS

Programming & Web Development: Java, Python, C++, HTML, CSS, REST APIs, GraphQL, Node.js, PostgreSQL, Go, LLM Workflows

Tools & Technologies: Git, GitHub, GitLab, Visual Studio Code, AWS, Kate, Eclipse, Postman, Tableau, Microsoft Office Suite

Databases & Systems: MS SQL, Oracle, MongoDB, Metrics Dashboards, Linux, Windows, macOS, Agile, Jira, Slack

Projects

Mini Market Inventory Optimization Platform (Python, PostgreSQL, SQL)

September 2025- August 2026

- Developed a data driven retail operations platform that consolidated inventory, transaction, and customer loyalty data across 2,000+ products and 5,000+ customers.
- Built automated inventory optimization workflows that analyzed sales history, seasonal demand, and promotional activity to generate reorder recommendations and low stock alerts, reducing manual inventory planning by 80%.
- Designed SQL based analytics pipelines processing 20,000+ transactions to identify revenue trends, fast moving products, inventory turnover rates, and campaign performance metrics.
- Engineered a POS integrated customer loyalty and engagement system that automated promotional campaigns, reward milestone notifications, and keyword-based point balance inquiries, supporting 5,000+ loyalty members and improving customer retention.

Broadcast Studio Production Planner (Node.js, Express, PostgreSQL, HTML, CSS, JavaScript, AWS Amplify)

April 2025

- Contributed to the design and development of a live-hosted broadcast planner to support rundown creation, script workflows, and production scheduling for news teams.
- Built the full stack using Node.js, Express, and PostgreSQL with dynamic front-end features in HTML, CSS, and JavaScript; implemented login authentication and script export.
- Assisted in deployment via AWS Amplify, maintained GitHub version control, and helped ensure a responsive, user-friendly UI through collaborative design work.

Enterprise Database Quality Audit Tool (SQL, Tableau, MS SQL, Oracle)

January 2025

- Wrote complex SQL queries to identify data duplication, nulls, and schema mismatches across MS SQL and Oracle.
- Visualized audit trends using Tableau dashboards to support weekly reporting for data stakeholders.
- Documented findings and collaborated using Microsoft Office tools in an Agile team environment.

API Performance Benchmarking Toolkit (C++, Java, REST APIs, Postman)

August 2024

- Developed scripts in C++ and Java to send test payloads and measure API latency and throughput.
- Used Postman collections to validate REST and GraphQL endpoints against expected schema responses.
- Logged results to CSV and generated summary reports to identify high-latency operations.

Codebase Refactoring and Testing Automation (Python, PostgreSQL)

May 2024

- Refactored legacy Python scripts to follow modular design and PEP 8 coding standards for readability.
- Implemented unit tests to verify SQL query outputs using a local PostgreSQL test environment.
- Used git for version tracking and documented improvements and test results for future maintainability.

Work Experience

Store Operations Manager & Inventory Systems Developer - Mini Market, MO

2023 - Present

- Developed a Python, PostgreSQL, and SQL-based inventory optimization platform to analyze product movement, sales history, and reorder needs across 2,000+ products.
- Led daily operations for a retail business, coordinating staff scheduling, vendor relationships, inventory planning, and customer service while supporting technology-driven process improvements.
- Supported customer loyalty and engagement features, including reward tracking, promotional campaigns, and point balance lookup for 5,000+ customers.

DoorDash Driver - DoorDash, MO

2021 - 2023

- Managed high-volume deliveries while maintaining efficiency, time management, and customer satisfaction.
- Planned optimal routes and resolved customer issues independently in a fast-paced environment.

Shift Leader - Panda Express, MO

2018 - 2021

- Supervised team members during shifts, supported training, and maintained service quality standards.
- Assisted with register balancing, inventory preparation, and daily opening and closing operations.
